INTERNSHIP REPORT PRESENTATION

Web Development Internship

Codec Technologies Pvt. Ltd.

TaskFlow — Responsive Task Management Dashboard

HTML5 • CSS3 • JavaScript ES6 • LocalStorage

01 June 2026 – 01 August 2026

B.Tech CSE | Batch 2025–2029

ABOUT THE STUDENT

Candidate Profile

Ayush
Dubey

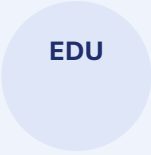

B.Tech – Computer Science & Engineering

Roll Number
25SCS1003004087

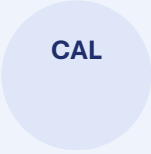

Institute
IILM University, Greater Noida, U.P.

Programme
B.Tech CSE, Batch 2025–2029

Internship Domain
Web Development

Duration
2 Months | June – August 2026

Codec Technologies Pvt. Ltd.

The internship provided practical exposure to web development through structured learning, hands-on implementation, testing and project-based work. The experience focused on combining HTML, CSS and JavaScript into a complete browser-based application.

01

Web Development

Hands-on practice with page structure, styling, client-side behaviour and responsive design.

02

Project-Based Learning

Applied concepts by building TaskFlow, a practical task-management dashboard.

03

Testing & Debugging

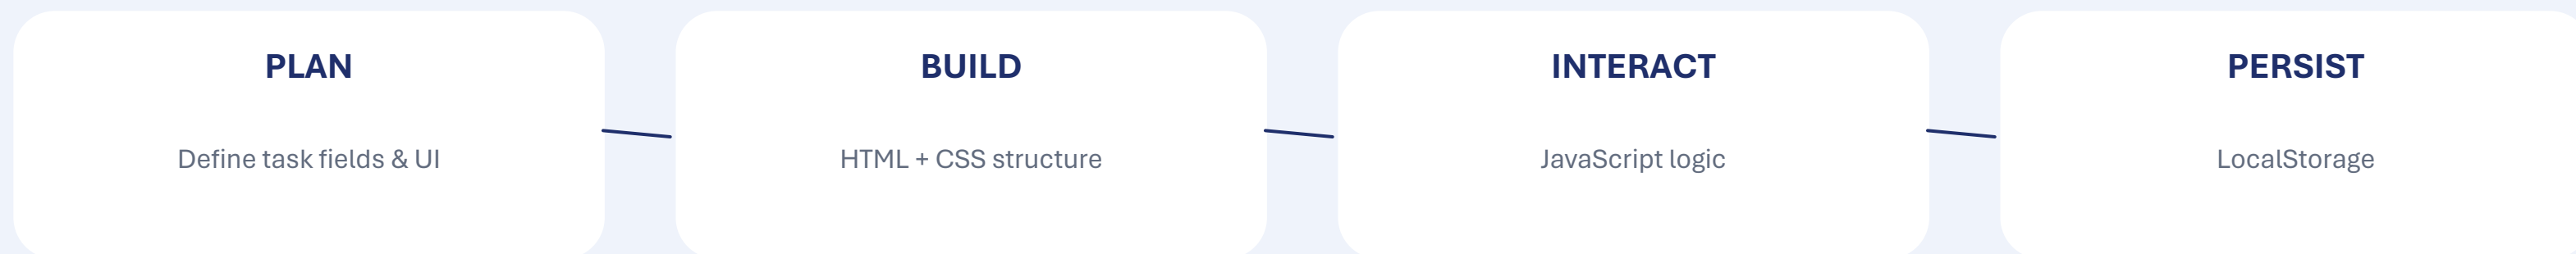

Used browser testing and developer tools to check interactions, layout and application behaviour.

Internship Role: Web Developer Intern | Mode: Pan India, Hybrid | Reporting: Assigned Project Head(s)

Bridging Theory and Practical Web Development

Students can learn HTML, CSS and JavaScript separately yet still face difficulty when these technologies must be combined into a complete, usable application. The project addressed this gap by implementing a real interactive workflow from user input to interface updates, persistence and testing.

TaskFlow addresses the workflow:

Result: a responsive browser-based dashboard where tasks can be created, completed, filtered, deleted and retained between sessions.

What the Internship Set Out to Achieve

Build Responsive UI

Create a clean responsive interface using HTML5 and CSS3.

Task Management

Add, complete, undo, delete and filter tasks.

Client-Side Logic

Use JavaScript ES6 and DOM manipulation for interaction.

Data Persistence

Store tasks locally using browser LocalStorage.

Dashboard Insights

Show total, pending, completed and completion-rate statistics.

Usability

Include dark mode and layouts suitable for desktop, tablet and mobile.

The Toolkit Behind TaskFlow

1

HTML5

Page structure

2

CSS3

Responsive styling

3

JavaScript ES6

Application logic

4

LocalStorage

Browser persistence

5

VS Code

Development

6

Git / GitHub

Version control

7

Chrome DevTools

Testing & debugging

8

DOM API

Dynamic UI updates

From User Input to Persistent Task Data

The Project Development Journey

1

Requirement Understanding

Identify user actions, task fields and dashboard needs.

2

Interface Design

Plan responsive cards, controls and summary information.

3

Implementation

Build HTML structure, CSS styling and JavaScript behaviour.

4

Persistence

Connect LocalStorage for saving and restoring tasks.

5

Testing

Test adding, completing, filtering, deleting and refreshing.

6

Refinement

Improve responsiveness, usability, dark mode and presentation.

Skills & Capabilities Gained

- Improved understanding of responsive front-end web development.
- Practical experience with HTML5, CSS3 and JavaScript ES6.
- Better understanding of DOM manipulation and event-driven interaction.
- Experience using LocalStorage for browser-side persistence.
- Ability to structure a small application from requirements through testing.
- Improved debugging and problem-solving using browser developer tools.
- Greater awareness of responsive UI/UX principles and project documentation.

TASKFLOW • COMPLETED PRACTICAL PROJECT

Successfully Completed

- Role
Web Developer Intern
- Organization
Codec Technologies Pvt. Ltd.
- Duration
01 June – 01 August 2026
- Batch
2025–2029

Thank You
